

The Relationship Between Income and Obesity in TEXAS

Obesity is defined as
a BMI greater than

30

(CDC)

In Texas,
the obesity rate is

35.7%

(TX Department of Health)

The Average Household
Income in Texas is

\$31,462

(US Census Bureau)

Dallam County has
both a high obesity rate
and average income

Hudspeth County has
a high obesity rate and
a low average income

Tyler County has both a
low obesity rate and
average income

Chambers County has
a low obesity rate and
a high average income

A variety of factors
can contribute to
obesity, such as “eating
patterns, physical activity
levels, and sleep
routines” (CDC). Income
can impact all
of these factors.
Consequently,
studies now show that
income can influence
an individuals
risk of obesity.
